

SUMMARY

Frontend Developer and B.Tech Computer Science student with hands-on experience building responsive web applications Using React.js, JavaScript (ES6+), HTML, Tailwind CSS and REST APIs. Built and deployed a Netflix-inspired web application integrating TMDB Api and Firebase Authentication. Currently developing a multi-user blog application using React and Appwrite, with external libraries, CRUD functionality and backend services.

TECHNICAL SKILLS

- **Languages:** JavaScript(ES6+), HTML5, CSS3
- **Frontend:** React.js, JSX, Tailwind CSS, Responsive Web Design
- **Backend/BaaS:** Firebase, Appwrite
- **Database:** Appwrite Database, Firestore
- **APIs & Data:** TMDB API, REST APIs
- **Tools and Deployment:** Git, GitHub, VS Code, Vercel
- **Core Concepts:** React Hooks, React Router, Authentication & Authorization, API Integration, CRUD operations

EXPERIENCE

TECHNICAL TRAINING | White Hat Coders | Mohali | 45-Day Summer Training

June – August 2025

- Completed intensive hands-on training in frontend web development and modern web technologies.
- Developed practical projects using HTML, CSS, JavaScript, and React.js.
- Applied component-based development, responsive design, API integration, and Git/GitHub workflows.
- Gained practical experience in building and deploying web applications

PROJECTS

Netflix-Inspired Movie Streaming Web Application | React.js, JavaScript, Tailwind, TMDB API, Firebase, Vercel | [\[Live Link\]](#)

- Built a responsive movie streaming interface using React.js with reusable components and React Hooks.
- Integrated the TMDB REST API to dynamically fetch and display movie data and trailers.
- Implemented Firebase Authentication for user sign-up/login and protected user access.
- Developed responsive movie browsing, category sections, and interactive UI components.
- Deployed the application on Vercel and made it accessible through a live production URL.

Multi-User Blog Application — In Progress | React.js, Appwrite, RTK, Tailwind CSS, React Hook Form | [\[GitHub Link\]](#)

- Developing a full-stack-style blog application using React.js with Appwrite as the backend-as-a-service.
- Implementing user authentication and authorization with user-specific blog ownership.
- Building CRUD functionality for creating, reading, updating, and deleting blog posts.
- Using Appwrite Database for persistent data storage and React Hook Form for form handling.
- Used the RTK(redux-tool-kit) for advanced statemanagement .

Paratha Nation — Restaurant Landing Page | React.js, JavaScript, Bootstrap, CSS | [\[GitHub Link\]](#)

- Built a responsive single-page restaurant website using React.js with a modern, brand-focused UI.
- Developed reusable React components to showcase signature dishes, pricing, team information, and brand content.
- Implemented a promotional loyalty-card section to highlight customer offers and improve user engagement.
- Designed a responsive layout using Bootstrap and custom CSS for consistent presentation across devices.
- Added a customer contact form for inquiries and structured the interface for a seamless browsing experience.

CERTIFICATIONS & TRAINING

- Web Designing — Training & Completion Certificate — White Hat Coders, Mohali | 10 Jun 2025 – 28 Jul 2025
- Personality Development Training Certificate — White Hat Coders, Mohali | 2025

EDUCATION

- **B.Tech** — Computer Science & Engineering | IET Bhaddal, Rupnagar, Punjab 2023 - 2027
Expected Graduation: 2027 | CGPA: 7.5/10 (through 5th semester)
- **Senior Secondary (12th)** — The Renaissance School, Bhanopli | CBSE | 70% 2020 - 2021
- **Secondary (10th)** — The Renaissance School, Bhanopli | CBSE | 84% 2022 - 2023
